

BEST IXUS™ BULK

X-ray Sorting

BEST IXUS™ BULK

The Ixus™ Bulk x-ray sorter provides the safest solution for customers' brand protection. By implementing the latest x-ray and imaging software technology, the effective removal of metal, stones, pits, glass, high density plastics, etc., is guaranteed.

DETECTION

The Ixus™ Bulk scans product in bulk to detect foreign material that can be dangerous to the customer. Metal, glass, small rocks, free flowing and embedded, are detected by absorbing more x-rays than the good product. The Ixus™ Bulk can also divide products into different categories such as size, shape,... The type of x-ray source depends on the product, type of defect and capacity.

REJECTION

The Ixus™ Bulk is very flexible and easy to integrate into the production line and can be used as a complementary sorter or as a stand-alone machine. Implementing an x-ray sorter at the beginning of the line will decrease your incoming defect load significantly and will facilitate further processing. At the furthest end of the line, it will minimize the risk to find anything unwanted in your final product, just prior packaging.

BENEFITS OF THE IXUS

- +Superior safety
- +Minimize yield loss
- +Easy to integrate
- +Flexible
- +Unparalleled throughput

APPLICATIONS

- +Almonds
- +Cashews
- +Hazelnuts
- +Pistachios
- +Peanuts
- +Raisins
- +Walnuts
- +Fresh & frozen cherries
- +Mussel meat (frozen & fresh)
- +Scallops
- +Olives
- +Whole potatoes
- And many others..

Gentle product handling is assured by design

The IXUS BULK's x-ray sorter sorts almonds for production.

WORKING PRINCIPLE

The product passes on a horizontal conveyor belt between an industrial x-ray source and an x-ray detector. X-rays are absorbed by the product and by the foreign bodies. The absorption rate is higher for denser or thicker objects. When foreign bodies are detected, they will be rejected by powerful air guns while the good product continues on its way.

- A** Infeed (unsorted)
- B** X-ray scanner
- C** Precise air guns
- D** Separate streams, accept, reject

1 X-RAY DETECTION

The x-ray bulk sorter has been engineered around the most performing x-ray detector to enable an unmatched resolution in order to find the smallest defects at high throughputs

2 LOW FALSE REJECT

The Ixus™ Bulk is equipped with precise air ejectors or solid high speed pneumatically operated flaps, to provide higher ejection accuracy, lower false reject and increased efficiency for more consistent sorting.

3 EASE OF USE

Quality control and feedback are secured by the intuitive Graphical User Interface (GUI) and touch screen. Thanks to the PAX system, customers or BEST service engineers can also access the machine settings from anywhere in the world.

4 HIGH CAPACITY

The Ixus™ Bulk 800 is designed for high volume processing with maximum detection and removal of foreign material and defective products.

ADVANCED SORTING PARAMETERS & TECHNOLOGY

-  Foreign Material
-  X-ray
-  Pit detection

DIMENSIONS AND SPECIFICATIONS

Model	Dimensions				Utilities		
	Width	Length	Height	Infeed Belt	Power	Air	Water (max)
IXUS™ BULK 420	923 mm (36,3")	2217 mm (87,3")	2170 mm (85,4")	1314 mm (51,7")	1,5 kVA	6 bar	3 bar
IXUS™ BULK 570	1162 mm (45,7")	2303 mm (90,6")	2170 mm (85,4")	1237 mm (48,7")	1.5 kVA	6 bar	3 bar
IXUS™ BULK 800	2739 mm (107,8")	2435 mm (95,9")	2649 mm (104,3")	1257 mm (49,5")	1.5 kVA	6 bar	3 bar

You are a Resource Revolutionary.

ODENBERG and BEST work together under the umbrella of TOMRA Sorting Solutions as leading providers of optical sorting and processing technology for the fresh- and processed-food industries.

Turning yield into usage, profits into progress, TOMRA transforms the way the world obtains, uses, and reuses its resources.
